

## IN THE OP FULL MOUTH REHABILITATION DEMONSTRATION PROGRAM

**The Goal:** This 2 weekend, 4 day demonstration and lecture program allows attendees to experience side by side learning with Dr. John Nosti, as he diagnoses, treatment plans, prepares, provisionalizes, and cements a Full Mouth Rehabilitation. Participants will have the opportunity to work in a small group atmosphere to absorb the particulars of the thought process, treatment steps and patient management of complex cases. Two full days of lecture, with hands-on segments, case treatment planning and clinical observation.

### Learning Objectives:

- Learn a predictable system for screening complex cases for joint, tissue, occlusal and aesthetic concerns
- Observe and practice bite records necessary for completing a full mouth rehabilitation
- Understand how to sequence the preparation and temporization phase of a full mouth rehabilitation
- Observe a step-by-step process of predictable cementation
- Learn two different styles of provisionalization that achieve temporaries that will last
- Practice and learn the camera settings and techniques for great intra-oral photos
- Master a facebow and stick bite record while understanding their value to the result of the restorative case
- Improve lab communication with submitting exactly what's necessary
- Participate in case planning workshops and skills testing
- Develop a patient protocol for rehabilitations from case presentation to post cementation

**Dates:** May 18, 19 2018 and June 22, 23 2018 - Chicago, IL

**Tuition:** \$6,400 per attendee\*

**CE CREDIT HOURS:** 32 units

Immediate post insertion and laser tissue re-contouring.

**Instructor:**  
**John Nosti, DMD,**  
**FICOI, FAGD, FACE**
